

Digistar GEN-R

11-12-2013

WHAT IS IT?

Series of inks for transfer sublimation printing, compatible with RICOH piezo printheads.

WHY CHOOSING IT?

- FOR TRANSFER PRINTING
- COMPATIBLE WITH RICOH PRINTHEADS

WHICH ARE ITS FEATURES?

- Very bright and vivid colours
- Good general fastness
- Excellent outlines definition
- Excellent release (transfer) capacity
- No risk labelling required

WHERE USING IT?

For transfer printing onto synthetic fabrics (polyester) or blended fibres (minimum 80% polyester).

For printing onto pretreated rigid substrates. Ideal for sportswear, promotional items, flags, banners, interior decoration.

WHAT MORE?

- **Out of the box:** compatible with RICOH printheads
- **Multipurpose:** it is possible to print onto various substrates for the most different uses

HOW USING IT?

TRANSFER PRINTING: the printed paper must be transferred hot, through calender or flat press, at a temperature between 180- 220°C during a varying time, between 180" and 30". Time and temperature may vary, depending on the type and nature of the material, which the transfer is made onto.

HOW IS THE SERIES COMPOSED?

- **DIGISTAR GEN-R BLACK**
Code: 501310_Package: 5 kg
- **DIGISTAR GEN-R CYAN**
Code: 501351_Package: 5 kg
- **DIGISTAR GEN-R MAGENTA**
Code: 501330_Package: 5 kg
- **DIGISTAR GEN-R YELLOW**
Code: 501315_Package: 5 kg
- **DIGISTAR GEN-R CLEANER**
Code: 501301_Package: 1 Kg

NOTES

These inks have been formulated to be consistent with printers equipped with RICOH piezo printheads. The right functioning depends not only on the printhead, but also on other elements inherent to the printer itself.

To get the updated list of the consistent printers, please contact our technical assistance: tc.service@kian.it.
